Department of CSE

UG CSE 5th SEMESTER Mini Project

Date: 23/09/2026

- Students can form a group with team size of **4 only**.
- Conduct a comprehensive literature survey of recent **2024–2026** research papers, published in journals by **Springer/ IEEE/ Elsevier/ ACM/ MDPI**. (Note: Conference paper are not permitted). Analyse the methodologies, algorithms, findings, and limitations of existing studies to identify a research gap that addresses a relevant societal or engineering problem suitable for a mini project. The Project Title shall be discussed and finalized in consultation with the Guide by **30th September 2026**.
- Map the identified societal or engineering problem to an appropriate **Sustainable Development Goal (SDG) and Domain Area**, with a clear justification explaining how the proposed project contributes to addressing the identified problem and the selected SDG. The SDG, Domain Area, and Project Title shall be finalized in consultation with the Guide by 7th October 2026.
- **Review-1**: 5th to 9th October 2026 (Literature survey)
  Review-2: 27th to 31st October 2026 (Design with basic module implementation)
  Review-3: 23rd to 30th November 2026 (Complete implementation and demo of the project)
- Students should prepare the hard copy of the project report and get it verified and signed by their respective Guide and HOD on or before **15th December 2026.**
- The **Similarity and AI generated content (using Turnitin Software)** of the Report and PPT should be less than 25% and the plagiarism report to be attached at the end of the report.
- The guidelines for the report and the presentation template will be shared shortly.

Note: Students are encouraged to **present their project work at national conferences or through poster presentation** to share their work and gain research exposure.
